RE: Patent 5,968,067

Dear Mr. Wood:

I have received your 2nd rejection letter, and this indicates that item (4) is lacking: "proof that proper identification of the patent and application numbers under 37 CFR 1.366© was submitted with the maintenance fee payment."

As I stated earlier this is a classic "catch-22" situation. I did submit your reminder to me as identifier along with my check, but this had my name connected to the wrong patent through no fault of my own. What we are asking is not unreasonable. We just want to receive proper credit for paying the renewal fee. There is no reason why our money should support the license of a different patent we had nothing to do with. We are resubmitting this to you for further reconsideration.

Sincerely,

Michael Mooreville, MD

Sorin Adrian, Ph.D.
